

Cavi-Break® X10 Strips

10mm Thermal Break for Modular Construction

Smart Solutions for Modular Builders

Efficient . Precise . Built for Better

Features

Easy to cut using hand tools with no hazardous dust

Fire retardant additives to ensure a low flame spread risk

Lightweight & easy to handle for effortless installation

1200mm lengths for easier storage, handling, & faster installation

Compact design ensures space efficiency without sacrificing performance

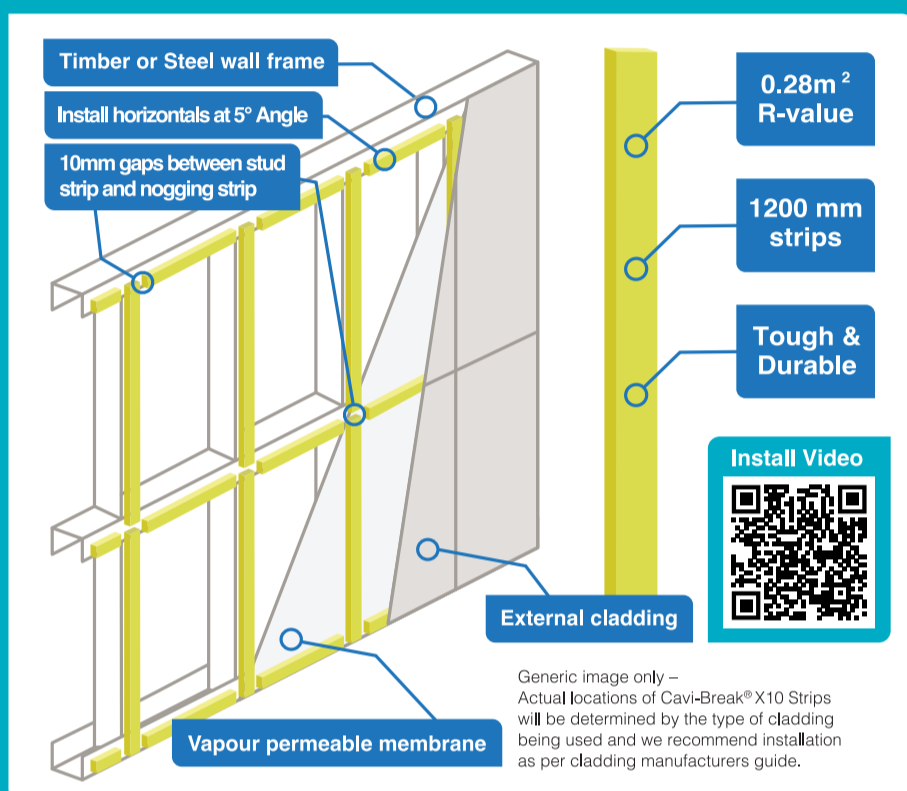

Reinforced self adhesive backing for superior adhesion

Resistant to mould, rot, mildew & termites

Boost energy efficiency & ensure compliance

Australian Thermal Industries (ATI) specialises in the production and supply of a multi-use, high performance thermal break that enhances energy efficiency in modular homes.

We are a proudly Australian-owned business. ATI Cavi-Break® X10 Strips reflect ATI's commitment to innovation, sustainability, and delivering smarter building solutions. Designed specifically for Australian modular builders, this product enhances efficiency and ensures compliance in modern construction.

ATI Cavi-Break® X10 Strips

Cavi-Break® X10 Strips are a cutting-edge thermal break solution designed for modular construction. With an industry-leading R-value of R0.28, they reduce thermal bridging, ensuring superior energy efficiency in compact wall systems, straighter walls and reduced movement during transport. Engineered for modular precision and compatible with a range of lightweight or metal cladding systems, these self-adhesive strips are the ideal choice for builders prioritising performance, durability, and ease of installation.

Specifications

- **Dimensions:** 1200mm L x 45mm W x 10mm profile tailored for efficient modular wall systems.
- **Contents:** 140 strips per carton.
- **Performance:** High compression strength, ideal for modular builds.
- **Packaging:** Recyclable cardboard for reduced environmental impact and sustainability.

Installation made simple

- **Prepare Surface:** Ensure the vapour permeable barrier is clean, dry, and dust-free.
- **Peel and Stick:** Remove the backing liner from the self-adhesive strip.
- **Align and Secure:** Place the strip firmly, ensuring it is straight and parallel to structural members.
